

KAREN DOMBROWSKI, RN

CERTIFIED IN NURSING

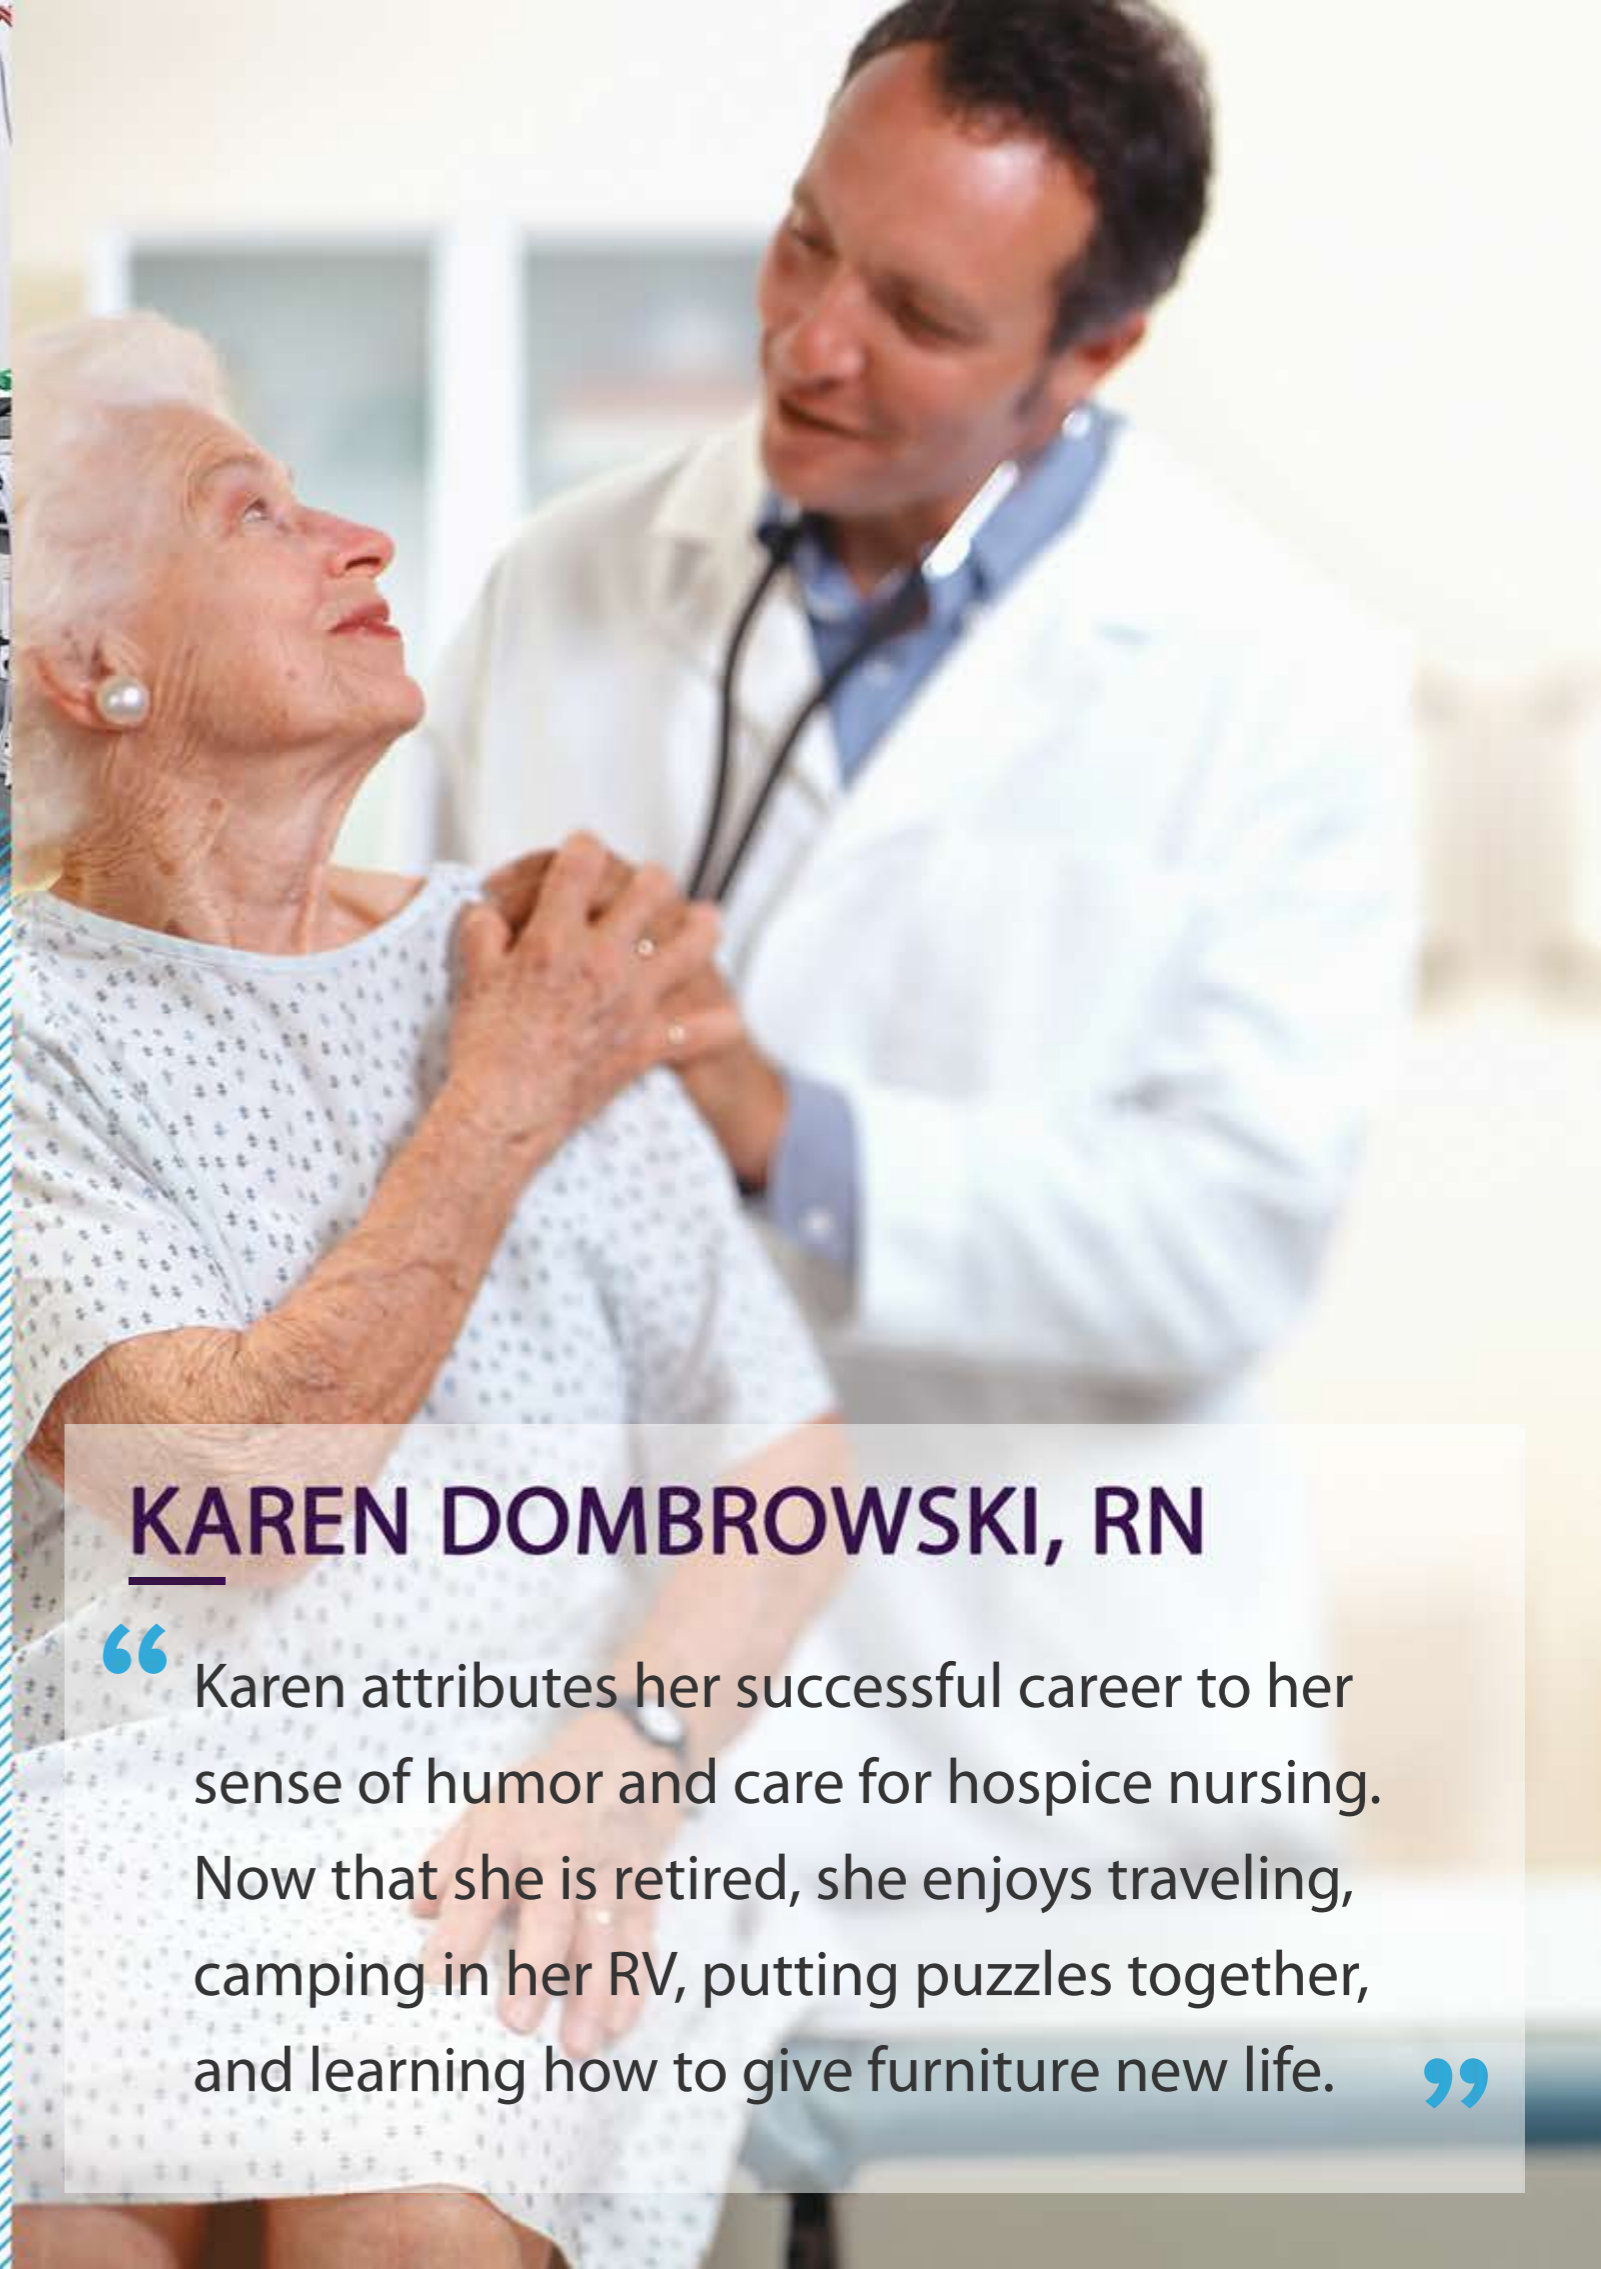

Karen attended Front Range Community College and earned her nursing degree in 1992, giving her over two decades of experience in her field. Karen started nursing school at the age of 40, after raising her three children. She began nursing in long term care and was introduced to Hospice care. She was able to say to herself, "I finally found what I was meant to do!" For the next fifteen and a half years as a hospice nurse, she learned and perfected the hospice way of helping patients and families through their last days there. Ensuring that patients desires, needs, and wishes are met. The families pain and suffering are also met with the assistance of the team, the Registered Nurse, Social Worker, and spiritual care.

Karen's been retired now for three years and deeply misses the close interactions with those patients, families, her team members, and the warm wonderful feeling of hospice work.

EDUCATION

- Nursing Degree: Front Range Community College

KAREN DOMBROWSKI, RN

“Karen attributes her successful career to her sense of humor and care for hospice nursing. Now that she is retired, she enjoys traveling, camping in her RV, putting puzzles together, and learning how to give furniture new life.”
